Address my claim that trout mouth and reject simple objects from sticks to bubbles to pebbles before we continue. At that point, we'll discuss whether fish spawn in the stream. Those trout certainly wouldn't lower themselves to eating eggs... no way.

You want—or need--my acknowledgement? Aw, they are so cute when they're young.

Just go catch the fish... that's all you have to do. It's what we call... "a challenge."

Man up.
