I tried for at least an hour today to hook one of these 5 big carp that were hanging around a stump, I Couldn't get it done. I'm going to bring some saltwater clousers tomorrow.

I was fishing for Smallmouth, and one came out from under a stump, and scared the crap out of me! I threw the whole box at him. They would follow the wolly booger, but would not take it. I think a cone-head WB would work better.
