Yes, there are a lot of herons...

Alby, in Westmoreland we have to get the Trib. They do fine with the regular news. PG doesn't cover anything out here. Its just funny when they call out the "liberal media" and then slant their editorials in the opposite direction just as far. Often times "facts" in their editorials conflict greatly with information printed in real news stories just a page or two away. They just choose to ignore reality.
