Fished the Yough. on Sunday late morning. Found some fish below Confluence Dam in the shalows and edges. Managed a few on: green weenies, ants, and tan caddis. Seemed like there were many fish in the stream, but little action on top.

Moved down by Ramcat and opposite happened. Flies on the water and no action. Saw: blue quills, cahills, few large mayflies, tan caddis. No takers for my flies though.

Was a fun day.
