"We've been seeing herons everywhere we go," says Beth Fife. "The expanding population is really due to better water quality, more abundance of wetlands, everything."

Well yes and no. I think the Herons have discovered welfare in the form of the Pennsylvania Fish Commission. Think of it as unweaned Heron mothers and trout welfare babies. As far as conservative bashing, please take a look how our illustrious liberal governor is selling our wild areas to the Oil and gas developers. I have a feeling we aren't going to fare any better with any administration. So whether the trib is conservative or the post gazette is liberal...

There is unrest in the forest,  
There is trouble with the trees,  
For the maples want more sunlight  
And the oaks ignore their pleas.

The trouble with the maples,  
(And they're quite convinced they're right)  
They say the oaks are just too lofty  
And they grab up all the light.  
But the oaks can't help their feelings  
If they like the way they're made.  
And they wonder why the maples  
Can't be happy in their shade.

There was trouble in the forest,  
And the creatures all have fled,  
As the maples scream "Oppression!"  
And the oaks just shake their heads

So the maples formed a union  
And demanded equal rights.  
"The oaks are just too greedy;  
We will make them give us light."  
Now there's no more oak oppression,  
For they passed a noble law,  
And the trees are all kept equal

By hatchet, axe, and saw.
