I actually got my stuff a few weeks ago. I did not get a kit, but instead got the Renzetti travelers vice, a Dr. Slick tools set, and then just bought all the materials I needed for a few recipies. So far I've tied a lot of assorted midges, some hares ears, pheasant tails, griffiths gnats, adams, and am starting on Caddis.

So far I've cought a whole bunch of fish on the hares ears I've been tying. They have a dark beadhead (not the flashy gold kind, these ones look more dark grey/black) and rubber legs.
