whats nice is you can just tie that hares ear in different colors and sizes and hand have just about every nymph anywhere covered. Learn a basic dry mayfly (like an adams) and adjust the colors to what you need too. I tie my lighter caddis with elk hair type wings and my darker caddis with tent style wings....again, adjust the color and to what you see on stream and you'll be set. Sounds like you're on your way...have fun.
