If you are talking about spooking trout on small streams, just go fishing after a good rain. You don't have to worry much about sneaking around.

Those of us who fish small mountain streams a lot pay a lot of attention to water flows and the weather.

While many flyfishers, cancel their fishing trips when it rains hard, we do the opposite. Heavy rainfall is your cue to go fishing! For example, today (Friday), we're getting a lot of rain. This weekend should be very good. You won't have to sneak around all that much.
