I just tought it was pretty cool that's all. I thought it may add some action to the tail. maybe if I tie some marabou on the back of a standard streamer like that almost like a wooly bugger.

Thanks for the opinion though.

funny you should mention the bugger. WE once got into a bunch of croaker and I stuck a bugger on to see if they'd take those too...only wanted the damn Clouser. Shame too. I had a lot more buggers in my box. I did get some pompano to hit a bugger though.
