I recommend these flies:

Stimulators w rubberlegs size 12- 16. 2nd choice for unpressured trout. After your drift....twitch it back upstream just under the surface. If you dont get a brookie on top youll get him the second time. You can use it as a grasshopper or a large caddis by skittering it and skating it.

bettles size 14 - 16

ants 18 - 24

Griffaths Gnat size 18 - 24

BWO's They hatch on almost all streams. size 16-22

***3 BH olive, 3 BH black and 3 BH white crystal flash bugger. size 10 (cut the tails a little shorter for short strikes or tie the bugger tail more on the hook) Unpressured trout love these flies and are my number 1 choice.

flashback scuds size 16-18

copper johns size 18 - 22

Just a small list.....bring plenty of buggers

When hiking in take as little as possible when it comes to flies. These types of trout are not selective. Now that said carry in water and first aid. You never know 😊 make room for the more useful stuff.
