I just received my Tenkara USA Yamame Rod. I am truly impressed with the quality that it has.

I purchased my leader from Tenkara USA also.

When I got home from work I had to try out the casting on it. I rigged it up in about 2 minutes and was casting a lot quicker that when I learned to cast a fly line.

I have an inground pool and was able to cast a straight line in not ime at all. I played a bit with casting a few different size flies and did not see any discernable loss in control.

I can't to try it out on a stream. Hopefully Wednesday evening after work on a nearby creek.

Wish me luck!
