From what I understand, there is a new DEC training facility on the SR now, so maybe that will mean more enforcement especially during salmon season.

They bought the Portly Angler Motel, but have been short on funding to convert it into a training center, although that is the long term plan. That river definitely needs more officers during peak season, although I have to say, I've seen more NYDEC officers in my lifetime than I have PFBC, and I only go up once or twice a year.
